

B1 Internet Box Product Fact Sheet

B1 Connect is working in partnership with Intel and Race Online 2012 to reduce the digital divide affecting 9 million people in UK. The B1 internet box is:

Easy

- Works like an appliance - one button operation, on in 10 seconds
- No software to install
- Use with your HD ready TV or existing monitor
- No previous computer experience needed

Safe

- No worries about viruses
- No software to maintain or go wrong
- No local disk to damage or corrupt

Low Cost

- Low power - about 8 watts as compared to a PC at 100 watts
- Price includes web cam, wireless keyboard and cables
- Target price £ 149.99

Availability

The B1 internet box is being piloted with third sector agencies (AgeUK, Circle Anglia and a number of care homes.) Early access is available to partners through the website (www.b1connect.com) with general release anticipated 1 July 2011.

Pilot Overview

As part of our efforts to make technology and internet access more affordable and easy to use B1 is conducting a three month trial of our innovative platform with partners Intel, Race Online 2012, AgeUK, Circle Anglia and Finer Day. Combining the benefits of cloud computing with the advancements made by Intel in low power computing, B1 created a new innovative platform that allows anyone to browse the internet or talk to relatives via Skype from the living room, using an existing TV. The B1 internet box is small, easy to install and use for people who have no online experience.
